Experience

Boeing - Software Developer - to Dec. 2022 to Present

- Positioned within the Ground Controls team, a cornerstone division servicing major airlines such as United and Delta, instrumental in facilitating the seamless management of flight patterns to ensure operational efficiency and safety.
- Operate within an Agile environment, collaborating closely with cross-functional teams to continually refine and optimize client outcomes, leveraging a suite of tech including Angular, Java, Azure, and other industry-leading technologies.

Kor Financial - Software Developer - to Jun. 2022 to Feb. 2023

- Spearheaded the complete overhaul of an outdated WordPress website, employing Next.js and Contentful to craft a modernized digital platform. Collaborated extensively with both design and marketing teams to ensure alignment with brand aesthetics and strategic objectives.

PayPal - Software Engineer - to Jan. 2022 to Dec. 2022

- Engineered innovative tools key in advancing automation efforts, thereby optimizing and expediting routine customer service operations to bolster overall efficiency.
- Utilized an expansive array of advanced technologies including React, Node, Java, and more within an intricate microservice architecture, fostering a dynamic and scalable cloud-based environment.

Siros - Full Stack Developer - Dec. 2020 to Jan. 2022

- Engaged in the development and design of a user-friendly Graphical User Interface (GUI) employing React and the CesiumJS framework, aimed at delivering an engaging and immersive GIS experience.
